The Third British Empire developed after the World War. The tactics of the former empires were changed and revised and an entirely new policy was developed towards the colonies. #### DISCIPLINE

Soon, when we become teachers, one of the important and difficult problems with which we will be faced will be that of maintaining discipline in our class rooms at all times. However, even with this perhaps in mind many of us may refuse others the courtesy which we ourselves expect to receive. Such was the state of affairs in last Tuesday's assembly and in many assemblies of the past.

Without regard for the feelings of others, students who are supposedly here with the intention of securing an education and who are supposedly ladies and gentlemen, seem to show no compunction about creating annoying disturbances. A teachers training institution is no place for such conduct.
